@scottmotte

SendGrid

Passwords suck.

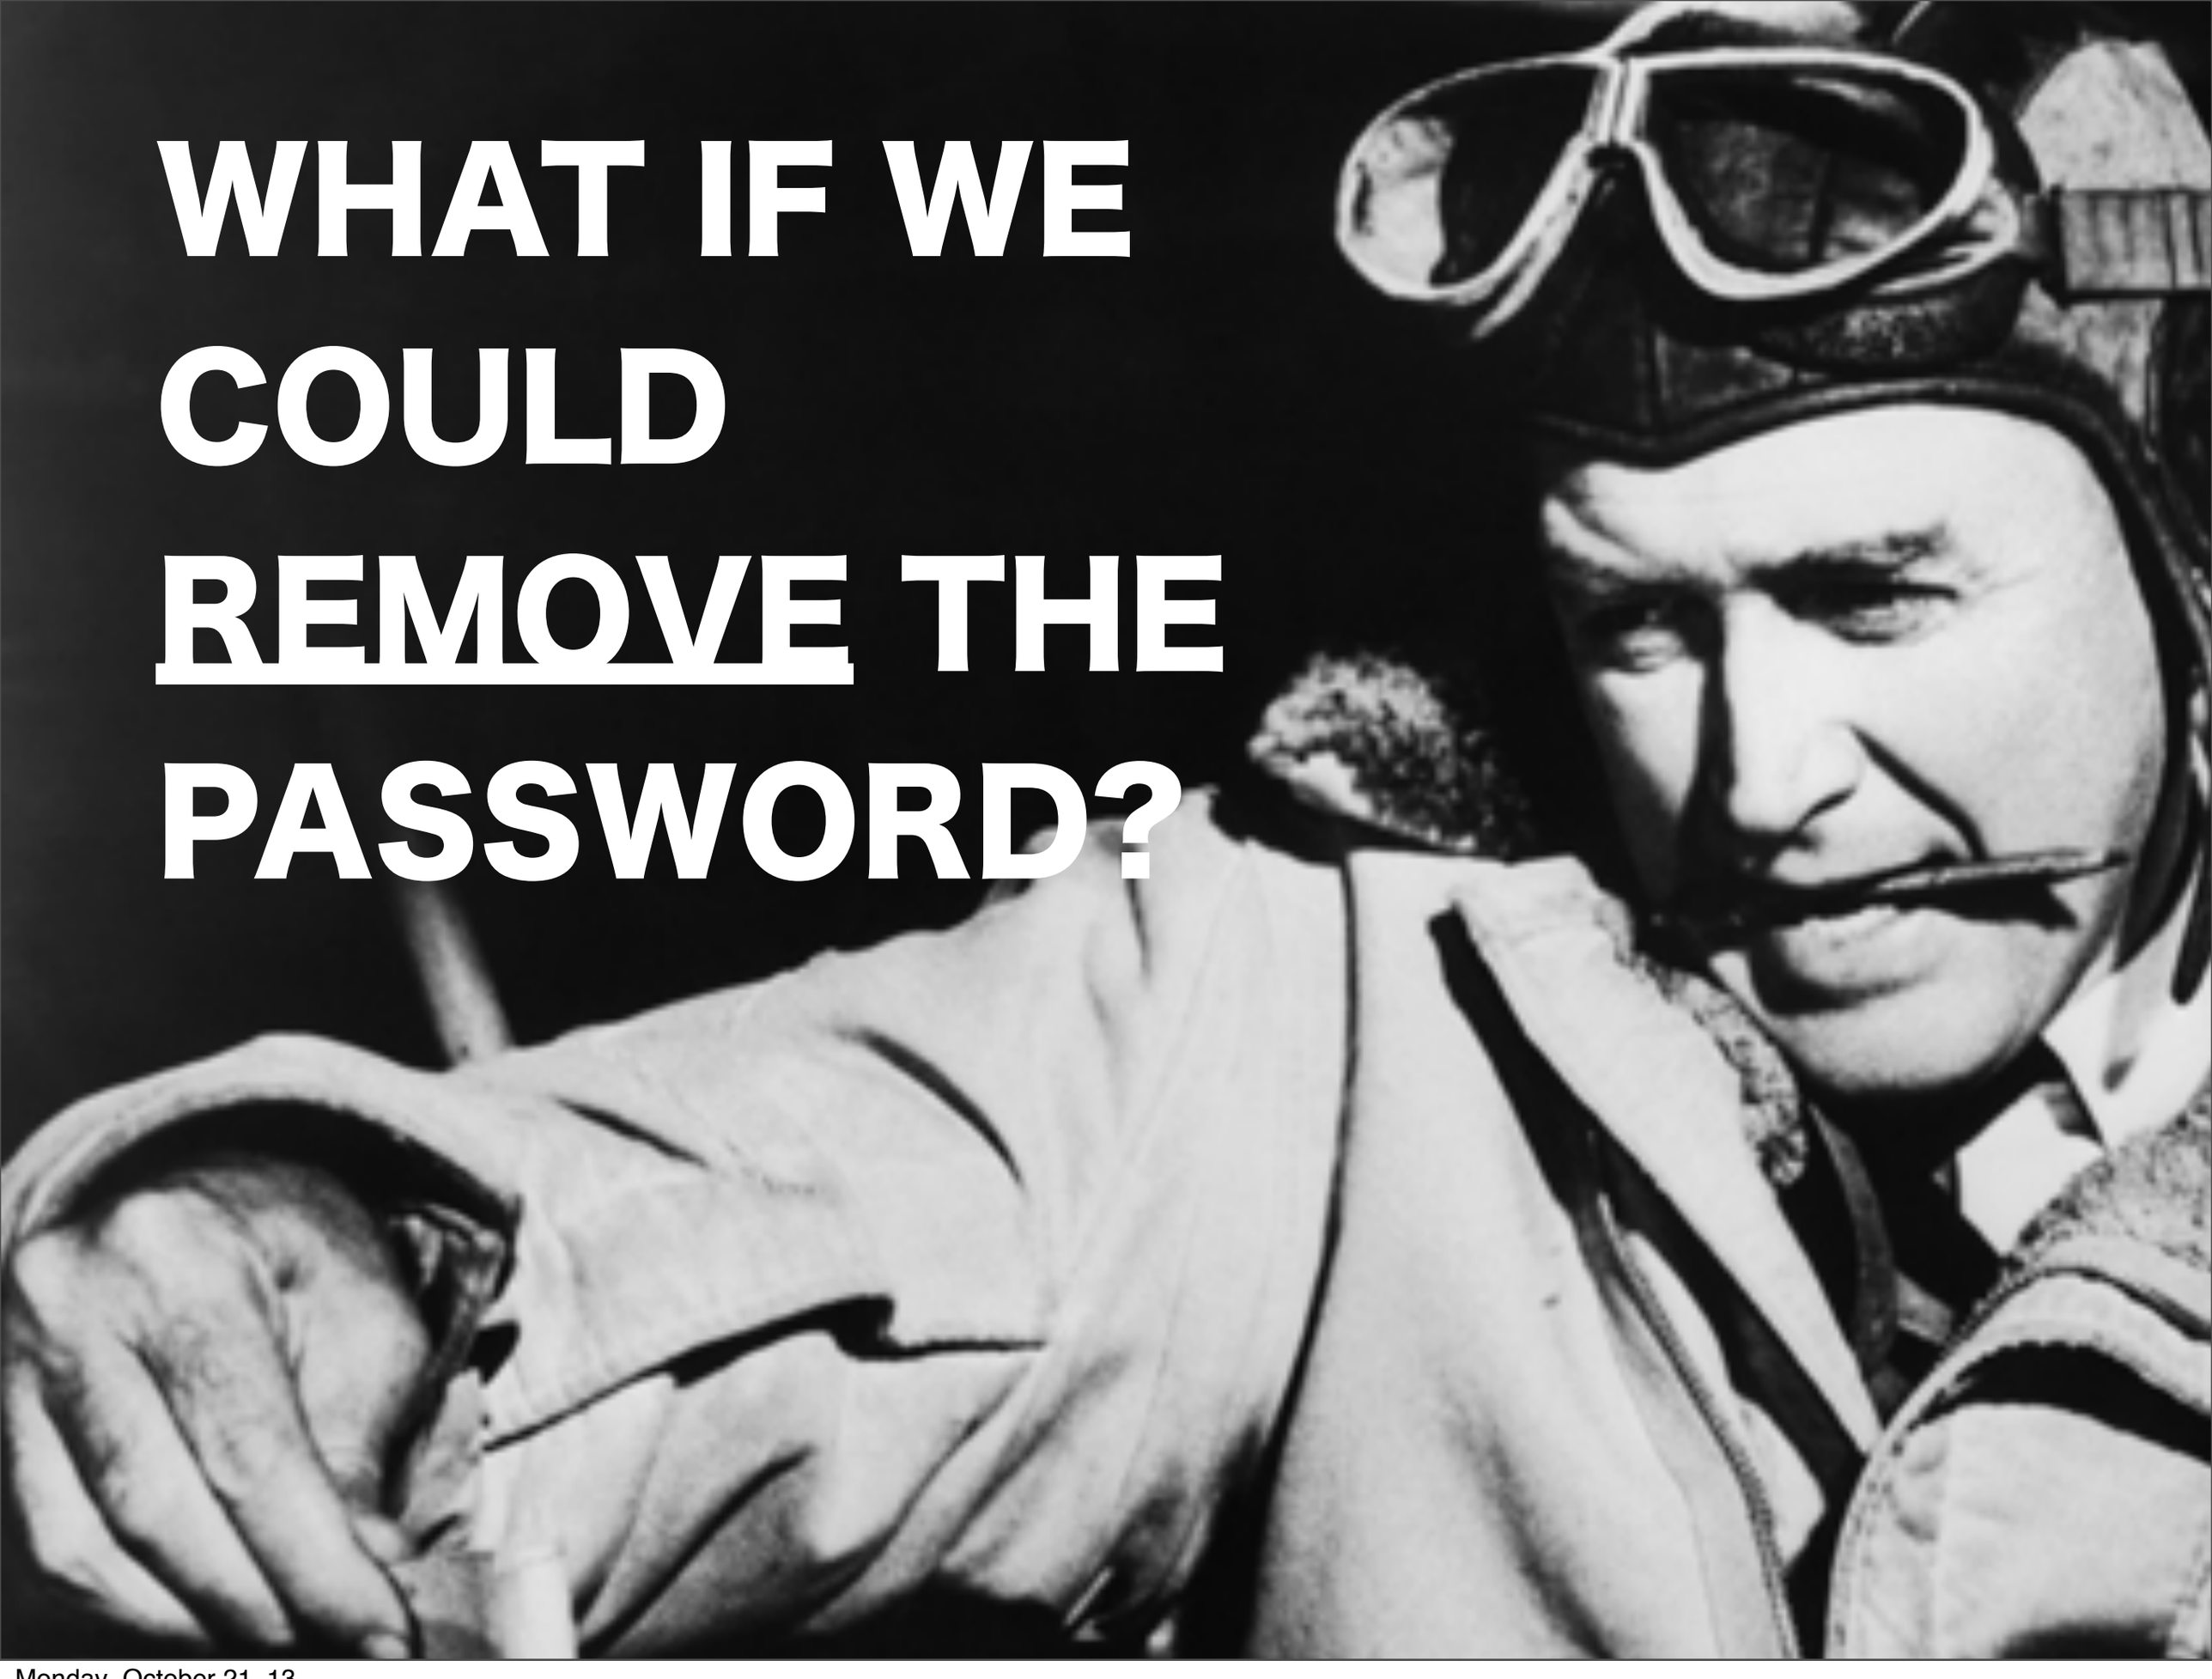
As a user

[-] Hard to remember
[-] Encourage insecure password re-use
[-] Never expire

As a developer

[-] Tough to code for

WHAT IF WE COULD REMOVE THE PASSWORD?



As a user

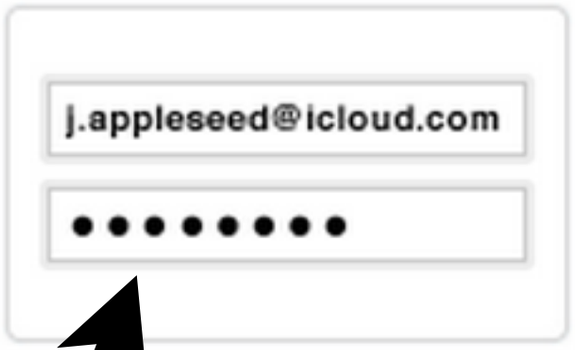
[+] Nothing to remember
[+] Zero chance to re-use a password
[+] No crusty unexpired passwords

As a developer

[+] Less code to write

Right under our nose

Let's look into two-factor auth



Password

Short code via sms or other means

Enter the short code to login

Why are we doing this?

Because passwords suck.

Let's try something.

Email Only Authentication.

SEE IT IN ACTION

email | Request Login → authcode | Confirm Login

LET'S WATCH A VIDEO
