SendGrid

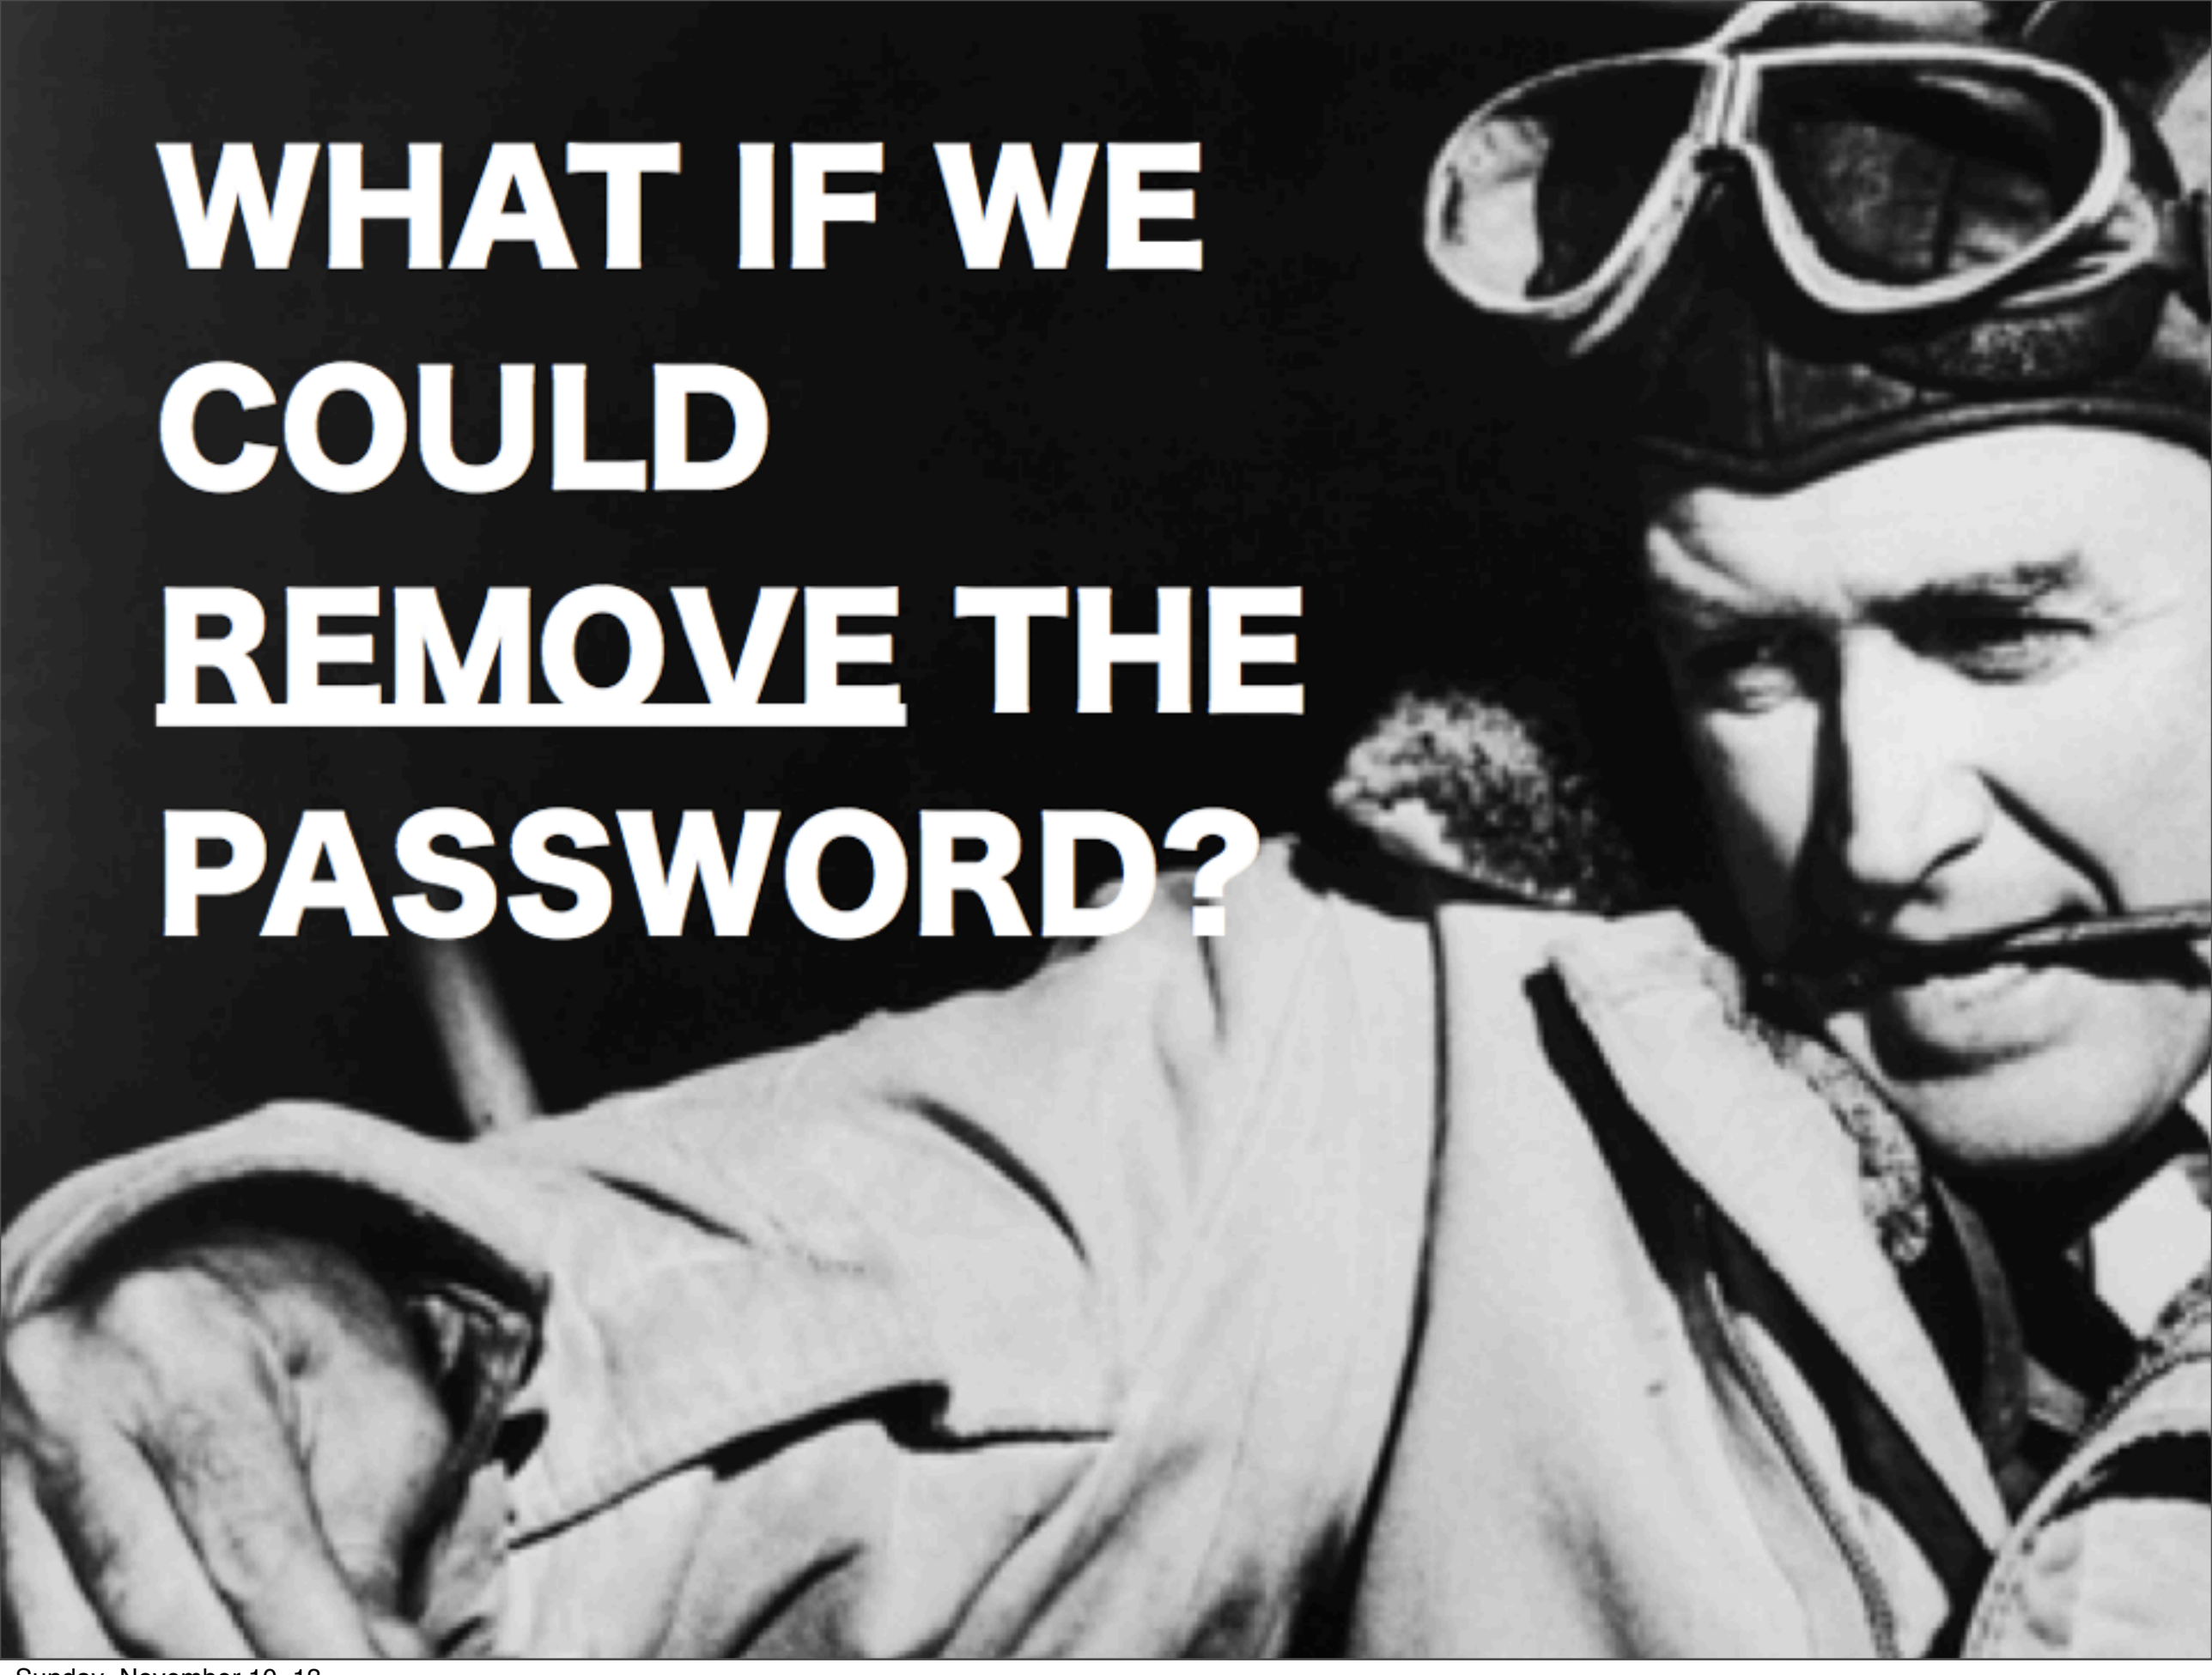
Passwords suck.

HARD TO REMEMBER

ENCOURAGE INSECURE PASSWORD RE-USE

NEVER EXPIRE

WHAT IF WE COULD REMOVE THE PASSWORD?



Handshake.js

Let's see it in action.

Nothing to remember.

Zero chance to re-use a password

No crusty un-expired passwords.

Let's look at two-factor auth.

Password

Short code via sms or other means

Enter the short code to login

Also, easier for the developer.

Let's code.
